

Mobility Solutions

Liberating enterprise from the constraints of fixed line connectivity.

As the performance of cellular technologies increases, more and more networks are becoming truly enterprise capable. With over 15 years experience in the deployment and management of fixed and cellular networks we understand the RF environment and are dedicated to providing intelligence driven solutions for our customers.

Our solutions are built using leading technology partners and carriers and supported by our 24/7 international support team and over 25,000 engineers in 200 countries around the world.

Cellsmart mobility solutions allow customers to benefit from flexible and agile connectivity solutions that adapt to their needs whether that is IoT, POS, guest WIFI in Taxis and Public Transportation, GPS and Telematics in service vehicles and delivery trucks.

Advantages

- One stop solution
- Carrier & technology agnostic
- Simple & rapid deployment
- Flexible & Agile
- Compatible with IPV4, DMVPN and SDWAN
- Available in 200 countries
- Onsite installations & planning
- 24x7 multi-lingual global support
- Real-time Telemetry Data
- Central Management
- Protect Mission critical data

Use Cases

- IoT for long-haul trucks
- Mobile PoS Solutions
- Mobile Guest WIFI
- Fleet Management
- In-vehicle digital displays
- Security Cameras

Harness cellular intelligence to drive your connected vehicles

Stable mobile connectivity is critical in today's connected world. CELLSMART's intelligence driven mobility solutions provide field based and transportation companies with the ability to remain connected to mission critical applications and for value for their customers.

Remain Connected
– multi-operator SIM solutions mean you are never out of coverage.

Secure Connectivity
– use secure gateways and transport to protect your confidential information, process payments and provide security camera feeds.

Best in Class Hardware
– intelligence driven hardware sourcing and support ensure you get the right solution for your needs.

Intelligence driven Installation & Support
– benefit from CELLSMART's 25,000 engineers in 200 countries for installation and support.

Intelligence Based Monitoring
– managed proactive monitoring provides telemetry, performance, and utilisation data when you need it.

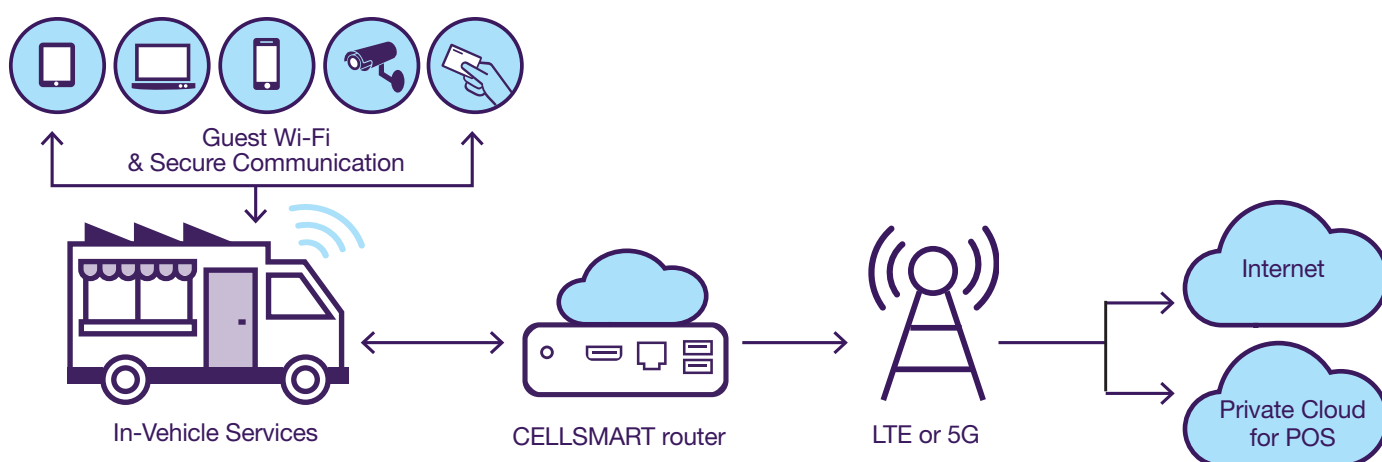

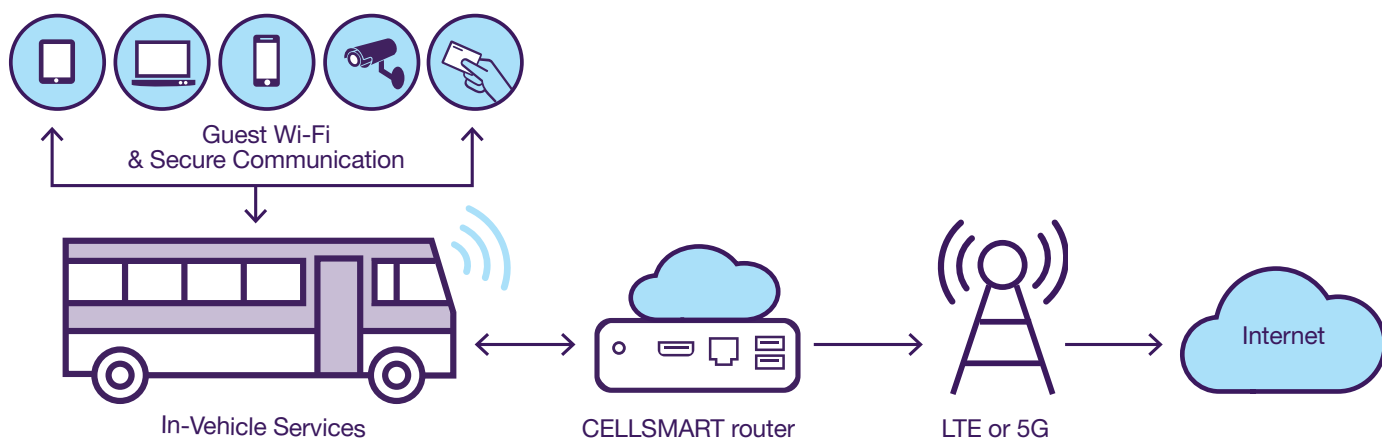

To find out about how CELLSMART can liberate you from the constraints of fixed line connectivity please contact us at solutions@cellsmart.io or go to our website and chat with one of our advisors.

CELLSMART

FIXED WIRELESS SOLUTIONS

Drive Revenue & value with disruptive cellular solutions

- 1** Extend WIFI connectivity to guests
- 2** Provide secure PoS solutions for mobile retailers and POPUP Stores
- 3** Drive digital signage
